### OSAKA "WA-FU DASHI" CURRY

Bringing Back the Beloved  
Taste of Osaka  
from 100 Years Ago

#### ● Product Details

This curry traces its roots to a recipe made by our founder's grandmother, born in the Taisho era (1912-1926). She would finish her Oden with curry powder added to a broth rich in bonito and kelp. Our version uses premium natural broth made with freshly shaved bonito flakes and Rausu kelp from Hokkaido, creating an elegant flavor that warms both body and soul. With no preservatives, it's crafted with health and safety in mind. Inheriting the philosophy of "not wasting a single grain of rice or drop of broth," we preserve the warmth and care of handmade cooking in every dish.

#### ● About the Company

In 2017, we opened a curry shop in Nakazaki-cho, Kita Ward, Osaka, and became incorporated in 2019. The company name, Zipang, comes from the name used overseas for Japan during the Age of Exploration. It reflects our mission to create products that connect the culture and food traditions that Japanese people have cherished for generations. We developed the "Zipang Method," which emphasizes carefully selected ingredients and artisan craftsmanship, and we now operate across retail, wholesale, and OEM businesses. In addition, we are engaged in upcycling initiatives, such as repurposing surplus or non-standard rice that would otherwise go to waste.

### How realistic! A food-shaped bookmark

Awe-Inspiring Craftsmanship  
Realism in Food Replicas

#### ● Product Details

Blurring the line between reality and replica, these ultra-realistic bookmarks are crafted using a unique hybrid technique that fuses the incredible artistry of Japanese food replica manufacturing with precision printing technology. From beautifully marbled meats to farm-fresh fruits and vegetables, each piece is so detailed and lifelike, you'll have to look twice! Made with biomass-certified soft PVC, they're not only eye-catching, but also eco-conscious — perfect for customers who value both creativity and sustainability. Bring some fun to your page-turning with a bookmark that's as unforgettable as it is functional!

#### ● About the Company

Founded in 1932, we are one of Japan's original pioneers in the art of food replicas. For over 90 years, we've continually innovated our materials and techniques to reflect the ever-evolving world of cuisine—helping restaurants boost their visual image and drive customer engagement through stunning in-store displays. As global interest in Japanese culture grows, our super realistic food replicas are gaining attention from international audiences as well. In recent years, inquiries via our website and social media have surged. Now, we're bringing this uniquely Japanese craftsmanship to the world—letting you savor the menu with your eyes before your taste buds.

## 03 Osakashosekiinsatsu Co., Ltd.

[Exhibited Products & Technologies]

### Paper Stationery Brand "archshop"

Unique, Playful Paper  
Stationery for Your Own  
Enjoyment

#### ● Product Details

We are proud to showcase products from archshop, our original paper stationery brand launched in 2021. Born from our wish to expand the joy of writing, these in-house creations include "TabiComi," a notebook that lets you capture travel memories with stamps and comics, and "Jishoru," a notebook for recording special words to create your own personal dictionary. Come experience the ideas and design capabilities that only a printing company can offer.

#### ● About the Company

Founded in 1909, Osaka Book Printing Co., Ltd. is a long-established comprehensive printing company. We plan and produce a wide range of printed materials, including publications such as books and pamphlets, commercial printing such as flyers and posters, and product packaging. In recent years, we have launched our own original paper stationery brand, "archshop," and are focusing on planning and selling unique stationery that utilizes printing technology and ideas. By combining tradition with innovation, we seek out ways to communicate with our customers and deliver products and services.

[Exhibited Products & Technologies]

### INDIGO METAL

A Uniquely Crafted  
Metal Material Colored  
with Natural Indigo

#### ● Product Details

The featured product, Indigo Metal, is an aluminum material dyed with natural indigo. Using advanced anodizing (alumite) surface treatment, the dye is absorbed into the material for rich, lasting color. Additional surface finishes can be applied before or after coloring to suit specific designs and applications. Textured or uneven metal surfaces absorb more dye, creating deeper shades of indigo. Combined with a variety of color options, Indigo Metal makes possible a wide range of innovative designs.

#### ● About the Company

Founded in 1953, Nissei traces its origins to Kuhara Shoji, the trading arm of Kuhara Mining, the predecessor of Hitachi, Ltd. Today, as a comprehensive trading company, we work closely with various sectors of the Hitachi Group. Our strength lies in a long history of supplying products for industries demanding the highest levels of technology and reliability, such as railways and energy. Through the processing and molding of resins, metals, and ceramics, we continue to contribute to manufacturing, creating new added value by delivering advanced technologies that meet evolving social needs.

[Exhibited Products & Technologies]

### Konpeito Brands "KONPEIDOU" & "Koguma Star"

Enjoy Traditional Japanese  
Flavors in A New Way,  
Bringing the Best of the Ingredients'  
Flavors

#### ● Product Details

Introduced to Japan from Portugal in 1569 as confeito, konpeito has since evolved into a uniquely Japanese confection. With its colorful appearance and unique shape, it has long been loved by children and adults alike and enjoys high popularity overseas. At this exhibition, we present two konpeito brands: "KONPEIDOU," crafted with carefully selected natural Japanese ingredients and no artificial flavoring, and "Koguma Star," konpeito packaged in an adorable bear-shaped container. Made with time-honored methods, our konpeito offers a simple, nostalgic flavor.

#### ● About the Company

We have been producing konpeito candy since our founding in 1929 and chocolate confectionery since 1981. We have launched two konpeito brands, "Koguma Star" for children and "KONPEIDOU" for adults, and are loved by people of all ages. We deliver small moments of happiness and joy to those who find life boring or stressful by offering "cute and extraordinary snacks" made with traditional techniques and unique ideas.

## 07 ASENSE Co., Ltd.

[Exhibited Products & Technologies]

### TOOLMARQ — Solid Aluminum Desktop Planters (Machined with precision)

A High-Quality, Sophisticated  
Indoor Plant Pot that  
Creates a Stylish Space

#### ● Product Details

Our exhibited desktop planters are crafted from lightweight yet highly durable aluminum. Featuring a minimalist design and refined metallic finish, they enhance any space with a subtle sense of luxury when paired with indoor plants. Thanks to our unique technology, their beautiful texture remains long-lasting. Perfect not only for homes, but also for offices, restaurants, hotels, and showrooms, these planters elevate interiors with timeless elegance.

#### ● About the Company

Drawing on our expertise in precision machining and surface finishing developed through work in the camera and smartphone fields, we design and manufacture products using metals and resins. Through our original brand TOOLMARQ, we showcase desktop planters that highlight the natural beauty of milled aluminum's form and texture. Based in Japan, we manage everything from design to production in-house, delivering products that add a refined accent to interiors while proposing new styles of living and working.

## 06 Baisendo Co.,Ltd.

[Exhibited Products & Technologies]

### Umeda OKOSHI Factory

A Long-Established Company  
Founded Over 100 Years Ago  
Takes On the Challenge of Creating a  
New "Tengu Okoshi" Brand

#### ● Product Details

To pass down Osaka's famous confection "Tengu Okoshi" to younger generations, we launched the new brand Umeda OKOSHI Factory, preserving traditional methods while introducing modern flavors. Our bite-sized "New Okoshi" offers a light, crisp texture, updated with a mix of four kinds of nuts and caramel for a contemporary taste. We are also offering the Caramel Nut Okoshi Bar, available exclusively during Expo 2025 Osaka, Kansai. With the auspicious symbolism of iwaokoshi (rock okoshi) and the good fortune of the legendary Tengu, this is a sweet filled with both flavor and luck.

#### ● About the Company

Located in the heart of Umeda, this Japanese confectionery shop was founded in 1920 and is known for its Osaka specialty, "Tengu Okoshi." Its roots lie in the early Heian period, when "Okoshi," made from millet kernels coated in candy, was presented to Sugawara no Michizane, who visited Naniwa. The tradition of making Tengu Okoshi has been passed down since the Edo period, and in 2025 it was honored with the Minister of Agriculture, Forestry and Fisheries Award at the National Confectionery Exposition. Crafted with ingredients and methods passed on for many years, its rich flavor continues to be cherished as a beloved specialty of Osaka.

## 08 YAMAOKA METAL MOLD Co., Ltd.

[Exhibited Products & Technologies]

### Accessory Tray "Oase"

An Accessory Tray  
Made Using Molding Techniques  
to Create Curved Surfaces

#### ● Product Details

Our featured product, "Oase," is an accessory tray inspired by the serenity and harmony of a Japanese garden. With a ceramic-like texture and pleasing weight, it creates a sense of comfort. The gently curved base features subtle protrusions that also function as tray legs. Incorporating the globally popular Japandi interior style, Oase offers beautiful, minimalist storage. It also proposes a sustainable lifestyle, using a composite resin containing up to 75% seawater minerals.

#### ● About the Company

Founded in 1923, we have specialized in producing molds, mainly for eyewear. Starting in November 2024, we will launch the eyewear brand "molmena," leveraging our expertise in eyeglass mold manufacturing to create products that prioritize comfortable wear and contribute to a sustainable society. Additionally, in recent years, we have expanded our scope through collaboration with HaKU Design Studio, renowned for their CMF-inspired (color, material, finish) designs, combining their creative vision with our advanced mold technology that shapes complex, organic curves. This partnership has led to the development of a unique accessory tray.

## 09 FMC Co., Ltd.

[Exhibited Products & Technologies]  
**Duralumin Sake Cup**  
"tf ochoko"

A sake cup created with  
Craftsmanship that Connects  
People through Tradition and  
Innovation

### ● Product Details

This sake cup is crafted from duralumin, a high-strength aluminum alloy commonly used in aircraft and automobiles. Each piece is precision-milled by skilled artisans with expertise in machining fine components, then finished with anodized coloring to ensure excellent corrosion resistance while providing a beautiful luster and refined aesthetic. With its high thermal conductivity, the cup quickly takes on the chill of sake, enhancing the refreshing sensation with every sip. A modern fusion of Japan's traditional drinkware with advanced materials and techniques, it is truly a work of art.

### ● About the Company

We are a company with many years of experience in precision part processing using machining centers. We handle a wide range of materials, including aluminum, castings, iron, stainless steel, and copper. Our capabilities cover diverse processing needs, from square and round metal stock to sheet metal and surface treatments. In 2024, we launched our own brand, Tsunagari Factory, and began developing original products. Through these products, we hope to share our vision more widely and serve as a bridge for communication.

## 10 OSMAC Co., Ltd.

[Exhibited Products & Technologies]  
**"KIRI no RANGE de**  
**MUSHIBACHI"**  
"kirisai"

Easy Steaming with Water and  
Microwave. Natural Paulownia Wood  
Steamer

### ● Product Details

From our paulownia tableware brand "kirisai", this steaming bowl makes it simple to prepare healthy steamed dishes using just water and a microwave. To overcome paulownia wood's natural weakness to water, we apply Osmo Color, a German-made natural coating, enhancing both waterproofing and stain resistance. When microwaved, water poured into the bowl's base turns to steam, cooking ingredients evenly while releasing excess heat and moisture, ensuring a light, fluffy finish. After cooking, the bowl can also be used as tableware, reducing the need for extra dishes.

### ● About the Company

Under the slogan "Developing unique products to improve users' lives," we plan, manufacture, and sell natural wood products, including paulownia. We offer paulownia slatted beds and storage items, as well as the "kirisai" series of dining utensils that bring out the excellent qualities of paulownia while harmonizing with modern lifestyles. We also strive to meet a wide range of needs, including small-lot production of original OEM products for all-natural wood products.

## 11 BAINANSTEEL Co., Ltd.

[Exhibited Products & Technologies]  
**Displayable Emergency Pack**  
"LUMIBO"

A Disaster-Preparedness Item  
that Blends Storage  
with Ambient Lighting

### ● Product Details

LUMIBO, whose digital pattern on the surface brings a modern feel to any space, is a disaster preparedness item that doubles as both indirect lighting for everyday use and a storage box. By storing everyday items and non-perishable food items needed in an emergency, you can quickly access them in an emergency without panicking. By placing the box in a place where the family gathers, such as the living room or dining room, as an interior decoration, you can also raise disaster preparedness awareness in your daily life.

### ● About the Company

Incorporated in 1956, our company's core business is integrated production. In addition to steel material wholesaling, we serve industries such as steel trading, precision sheet metal, architectural hardware, production equipment, and machine part manufacturing. Using advanced technology—from 2D laser machines for flat plate cutting and drilling, to 3D laser machines for pipe cutting and drilling, and bending machines for bending and welding—integrated production is our core business. We also create custom-made store fixtures, signage, and other products tailored to the needs of diverse industries, from food to healthcare.

## 12 HORIUCHI MIRROR INDUSTRY Co., Ltd.

[Exhibited Products & Technologies]  
**"HORIUCHI MIRROR" Series**

Mirrors that Reflect  
Your True Skin Tone

### ● Product Details

The HORIUCHI MIRROR series uses high-transparency glass—refined to remove more iron, a common cause of dullness—combined with a reflective metal offering superior color accuracy. This unique pairing allows the mirror to capture your natural skin tone with exceptional clarity. By reflecting true-to-life colors, it helps you choose the perfect foundation shade and achieve precise color matching for makeup, greatly enhancing your finished look. It is also favored by many beauty industry professionals, including makeup artists and stylists.

### ● About the Company

Dedicated to "providing the right tools for personal grooming," we develop, manufacture, and sell unisex, ageless mirror products featuring our signature Napure Mirror, renowned for its realistic skin-tone reflection. Beyond the reflection itself, we study the gestures and movements of daily life to ensure the user looks graceful even while using the mirror. More than just a tool, our mirrors offer a way to see yourself objectively and a chance to discover a new you.

## 13 Tatsumi Creatif Co., Ltd.

[Exhibited Products & Technologies]

### Tatsumi | Japanese Art Bags

**Nishijin Textile Bags, with a History Spanning Over a Thousand Years, Now Perfect for Dressy Occasions**

#### ● Product Details

Showcased here are party bags from Tatsumi, a Japanese brand that brings Kyoto's Nishijin Textile, a weaving tradition with over a thousand years of history, into contemporary formal fashion. Each bag is meticulously handcrafted by skilled artisans, expressing a refinement and dignified beauty that machines cannot replicate. By blending the grace of Nishijin weaving with modern design, these bags perfectly complement formal attire such as dresses, enhancing the elegance and presence of their wearer.

#### ● About the Company

Founded 42 years ago, we are a workshop specializing in Japanese traditional bags. While approximately 80% of the products on the market are made overseas or by home-based production, we insist on making all of our products in Japan, with our skilled artisans consistently manufacturing them domestically. Our OEM products have been adopted by many famous department stores and kimono magazines, and we have received acclaim for our high quality from all quarters. We are particularly skilled in handling and patterning Nishijin obi, a Japanese fabric that requires backing thread processing, and our technique of finishing designs to match dresses is a unique feature of our company.

Tatsumi Creatif Co., Ltd.

4-9-15, Tatsumi Higashi, Ikuno-ku, Osaka City

HP

## 14 FUKUNAGA Co., Ltd.

[Exhibited Products & Technologies]

### FF JELLY HOLDER

**A Pouch Jelly Holder Designed for Marathon Runners**

#### ● Product Details

Developed specifically for marathon runners, the FF Jelly Holder solves the challenge of carrying large pouch-style energy gels that can't be secured on a belt. Designed to attach easily to existing pouches, its elastic belt ensures comfort and flexibility. Runners can slide the jelly pack to the front for quick access and to the back while running, keeping movements smooth and uninterrupted. The rainbow-colored design, inspired by the Osaka Marathon theme colors, also enhances visibility from a distance.

#### ● About the Company

Since our founding in 1947, we have been doing everything from cutting to sewing thick fabrics in-house. While tool and knife cases remain our core products, we also lead in upcycling initiatives—repurposing materials such as fire hoses, highway banners, Tokyo Dome tents, and uniforms into bags and accessories. We even transform customers' cherished personal items into new forms of value. In 2023, our "FF Bat Case," made from recycled fire hoses, was officially certified as part of the Made in Osaka Brand.

FUKUNAGA Co., Ltd.

1-7-4, Kouzu, Chuo-ku, Osaka City

HP

## 15 Sherpack Co., Ltd.

[Exhibited Products & Technologies]

### "Sherpack Sunny" — Universal Design Sanitary Bag

**A Sanitary Bag that Delivers Kindness to Everyone**

#### ● Product Details

The "Sherpack Sunny" is a sanitary bag crafted with expert bag-making technology and designed with universal usability in mind. Featuring a secure zipper and self-standing structure, it combines ease of use with excellent hygiene. Large enough to discreetly hold adult diapers and other sanitary items without showing contents, it provides peace of mind for users. This product is kind to both people and the earth, and was developed with the hope that it can be used by a wide range of people, regardless of gender, age, or nationality, not just women.

#### ● About the Company

We are a company based in Hirano Ward, Osaka City, that designs and sells bags that are useful to people. While bags are necessary for the safe and secure delivery of goods, plastic bags have recently come to have a negative image due to marine pollution and global warming. To increase the value of bags, we have developed high-quality, high-performance bags, including "Sherpack," a reusable clothing compression bag developed based on our knowledge of rice bags, and continue to create bags that are useful to people.

Sherpack Co., Ltd.

1-22-6, Kamikita, Hirano-ku, Osaka City

HP

## 16 KYOKUTOU Co., Ltd.

[Exhibited Products & Technologies]

### Sterilization and Deodorization Equipment "Green Mate"

**Effectively Utilizes Ultraviolet Light to Sterilize and Deodorize**

#### ● Product Details

We will be exhibiting our flagship product, the "Green Mate," an air sterilization and deodorization device. This device effectively utilizes ultraviolet light, simultaneously emitting both 185nm light, known as the ozone-generating ray, and 254nm light, known as the germicidal ray, from a single ultraviolet lamp, inactivating airborne bacteria and viruses. At the same time, the ultraviolet lamp generates pure ozone, powerfully breaking down and deodorizing odor-causing substances such as food waste and body odor. Its stylish exterior blends seamlessly into any space.

#### ● About the Company

Founded in 1968 as a metal processing and resin molding company, we have continued to engage in a wide range of manufacturing activities, including precision processing of pressed and sheet metal parts, processing of resin molded products, mold manufacturing, and assembly of OEM products. Since 2000, we have focused on developing and selling our own products. We strive to create products that are kind to both the earth and people, releasing products such as "Kusakarechan," a pesticide-free herbicide developed entirely from natural ingredients, and "Green Mate," an air sterilization and deodorizer that purifies the air.

KYOKUTOU Co., Ltd.

## 17 Desigzmi Inc.

[Exhibited Products & Technologies]  
**“MOJI MAP” —  
Map Design Expressed  
Through City and Town Names**

A Fresh Fusion of  
Typography and Maps

### ● Product Details

Our featured product, “MOJI MAP,” is an original map design composed entirely of place names. This playful visual blend of maps and text appeals not only to Japanese audiences but also draws interest from foreign nationals as a unique form of expression. Ideal for printing on T-shirts, merchandise, and souvenirs, “MOJI MAP” meets needs such as “seeking Japan-themed designs for foreign tourists” and “creating items to showcase hometown pride.”

### ● About the Company

This design company specializes in creating “communicative bird’s-eye views,” which depict building locations and work processes from above, as well as promotional materials, exhibition tools, and product planning. In recent years, they have focused on product development and licensing aimed at inbound tourism and overseas users interested in Japan, including the development of their unique “MOJI MAP” project, which uses typography to represent place names. Through this exhibition, they hope to meet partners for overseas expansion.

Desigzmi Inc.

10F ITM Tower, ATC Bldg.

## 18 and.more Inc.

[Exhibited Products & Technologies]  
**LandDiver**

Extremely Waterproof, Worthy  
of Being Called a Land Diver

### ● Product Details

LandDiver uses high-performance materials originally designed for diving suits, creating waterproof shoes that combine durability with flexibility and stretch. Resistant to rain and mud, these shoes are easy to clean and dry quickly. They offer impressive comfort and fit, featuring a slip-on design for easy on and off. Perfect for leisure, outdoor activities, and everyday wear, these innovative shoes deliver unmatched functionality in one pair.

### ● About the Company

Our company focuses on designing and selling shoes specialized in waterproofing, aiming to create “the one pair of shoes you really need.” With a timeless, basic design, we are committed to “responsible production and use,” pursuing truly useful footwear. We strive for zero waste and a sustainable society by developing shoes people will cherish for life, bringing smiles and gratitude from the ground up.

## 19 OGURI Corporation

[Exhibited Products & Technologies]  
**“mahora” —  
Eye-Friendly Notebooks**

Developed from the Voices of  
People with  
Developmental Disabilities

### ● Product Details

At first glance, “mahora” looks like a standard notebook, but it was developed incorporating feedback from people with developmental disabilities. It features three key design elements to enhance usability: paper with colors that reduce light reflection for eye comfort, distinctive ruled lines that make it easier to track rows, and a simple layout without dates or decorations. The notebook comes in three colors, two ruling types, and four sizes, allowing users to choose the one that suits them best.

### ● About the Company

We are a paper products manufacturer, primarily focused on notebook production. While our core business is contract manufacturing of OEM products for major stationery manufacturers, in 2020 we launched our own notebook brand, “OGUNO.” Based on the concept of “manufacturing close to people and society,” we have released notebooks developed for people with disabilities and notebooks made from sustainable materials. We hope that the more our brand awareness and fan base grow, the more we will contribute to society.

## 20 PROEMB, LLC

[Exhibited Products & Technologies]  
**Quick Patch**

No Iron Needed —  
Sticks Instantly!

### ● Product Details

The exhibited “Quick Wappen” is a new type of embroidered patch that can be attached to fabric without using an iron. Thanks to its highly durable adhesive technology, it withstands washing, making it a standout feature. Custom embroidery designs are also available. Simply stick it onto clothes, bags, or other items to easily add originality. This product leverages embroidery techniques from Osaka’s local factories, achieving both detailed design reproduction and mass production.

### ● About the Company

Combining “digital embroidery,” “co-creation,” and “craftsmanship,” Osaka-based embroidery manufacturer founded to bring value to the world. Preserving the art of embroidery, we plan and manufacture new embroidery products, such as embroidered smartphone cases and advanced embroidery techniques on washi paper. Currently, we are focusing on our “Quick Patches,” which can be applied to fabric without ironing. This product is gaining popularity for its ease and practicality, combined with high-quality Japanese embroidery.

About the Large-Scale Exhibition Utilization Program

## “GLOBAL-TEX”

For the GLOBAL-TEX project page, please scan this QR code.

GLOBAL-TEX is a joint exhibition program for Osaka-based small and medium-sized enterprises with a strong desire **to take their first steps into overseas markets** or **to further expand internationally**. Prompted by the Osaka-Kansai Expo 2025, these companies will exhibit together at four large-scale trade shows held at INTEX Osaka. **With each connection—whether domestic or international—we hope to cherish the spirit of "Ichigo Ichie (treasuring once-in-a-lifetime encounters)" and build relationships that continue to flourish for many years. This wish lies at the heart of the project.**
